PROFESSIONAL SUMMARY

Full-stack software developer and data warehouse specialist with 15 years building financial reporting infrastructure for banking, microfinance-adjacent sectors, and enterprise applications. Technical foundation in C#/.NET Core, PostgreSQL/SQL Server, and React/Angular—combined with deep understanding of financial systems from payment gateways to ERP modules to anti-money laundering platforms. Designed and operated data warehouses supporting billing systems (500K+ customers), regulatory compliance reporting (Australian banks), and FIS modules (petroleum corporation)—all requiring precise financial data handling, audit trails, and stakeholder delivery schedules. Expert at bridging software development and business operations: translating MIS requirements into technical architecture, optimizing SQL queries for performance, and ensuring data security protocols for sensitive financial information.

CORE COMPETENCIES

Languages & Frameworks: C# / .NET Core | Java / J2EE | C++ | JavaScript (jQuery) | React | Angular | ASP.NET MVC | REST APIs | Microservices
Database & Data Warehouse: PostgreSQL | SQL Server | MySQL | Oracle | ETL Pipeline Design | Query Optimisation | Data Warehouse Architecture
Reporting & Analytics: MIS / FIS Platforms | Dashboard Development | Financial Reporting | Crystal Reports | Real-time Data Pipelines | Predictive Analytics
Infrastructure & Integration: Azure | AWS | SCADA Integration | GIS Mapping | Data Security & Governance | Highcharts
Delivery & Leadership: Project Management | Stakeholder Management | Vendor Collaboration | Escalation Governance | Certified ScrumMaster (CSM)

PROFESSIONAL EXPERIENCE

Solution Delivery Specialist — Today's Tech

April 2025 – Present

- Lead end-to-end solution delivery from requirements discovery through to production release, aligning technical roadmaps with measurable business outcomes and stakeholder expectations.
- Drive sprint planning, backlog prioritisation, and dependency management; govern delivery with formal risk tracking and quality gates.
- Coordinate cross-functional teams across product, engineering, QA, and operations; conduct structured status reporting, stakeholder demos, and expectation alignment.
- Establish and enforce escalation procedures ensuring consistent operational stability across delivery pipelines.

Project Manager — BJIT Ltd

November 2016 – March 2025

- Managed stakeholder communication, vendor coordination, bug escalation, and delivery schedule adherence across all enterprise projects; coordinated with cloud, SCADA, and GIS partners for operational stability.
- Managed software development projects from inception to delivery
- Led a team of 30 developers and QA engineers
- Coordinated with clients to gather requirements and provide updates
- Developed and maintained project plans, schedules, and budgets
- Ensured timely delivery of projects within budget and scope
- Conducted code reviews and provided technical guidance to team members
- Designed & developed PDF creation software similar to Adobe Acrobat
- Created content creation tools for educators
- Developed bridge inspection management systems

Software Engineer — Intelligent Image Management Inc. June 2015 – October 2016

- Built automated data extraction pipelines using Tesseract OCR (Google), converting unstructured document images into structured, queryable data records for downstream reporting.

Software Engineer — Simplexhub Ltd August 2013 – June 2015

- Developed e-commerce, payment gateway, and medical service solutions on ASP.NET with SQL Server; managed database schema design and query optimisation for transaction-heavy operational systems.

Software Engineer — LEADS Corporation Ltd July 2012 – August 2013

- Built share market reporting software with SQL Server-based transaction management and real-time data reporting for financial stakeholders and operations teams.

Lab Technical Officer — BRAC University January 2012 – July 2012

- Supported programming lab operations and provided network and server maintenance, ensuring uptime for academic computing infrastructure.

Programmer (.NET) — CACTS Ltd April 2010 – December 2011

- Designed and developed ERP modules from scratch using ASP.NET and SQL Server, covering core business operations for an enterprise client.

NOTABLE PROJECTS

CWASA Billing System, NRW Tool & Management Dashboard

Multi-component digital ecosystem for Chittagong Water Supply & Sewerage Authority. Includes automated billing and payment processing, Non-Revenue Water loss reporting with SCADA integration and GIS mapping, and a real-time management dashboard for revenue and operational analytics with predictive capabilities. Stack: .NET Core / C#, SQL Server, React, Android (Kotlin), Azure / AWS, SCADA, Microservices, REST APIs.

BlueSky — Anti-Money Laundering Platform (Australian Jurisdiction)

Financial compliance reporting platform used by banks, brokerage houses, and hedge funds to identify investment activity linked to money laundering. Delivered data visualisation, structured report scheduling, and compliance-grade audit trails. Stack: C#, ASP.NET MVC, SQL Server, Highcharts.

ERP Solution — Eastern Refinery Ltd (Bangladesh Petroleum Corporation)

Full-cycle ERP covering Inventory, Accounts, Payroll, and HR modules with Crystal Reports-based financial reporting. Stack: C#, ASP.NET Web Forms, SQL Server.

EDUCATION

B.Sc. in Computer Science and Engineering — BRAC University, Dhaka

H.S.C. — Rangpur Govt. College, Rangpur | S.S.C. — Cantonment Public School & College, Rangpur

CERTIFICATION

Certified ScrumMaster® (CSM) — Scrum Alliance

PERSONAL DETAILS

Date of Birth: November 29, 1984 | Nationality: Bangladeshi | Marital Status: Married | Religion: Islam
